## TECHNICAL EXPERIENCE

<b>Recruit Me (web application)</b> Team Member – BCIT Industry Project	April - May 2020 Vancouver, BC
--	-----------------------------------

*An online platform with ability to recruit, administer, and retain quality laborers. The application can handle entire process from laborer application to confirmation of completed work specializing in the construction industry.*

- Defined tasks scope and managed the project using Kanban board in GitHub.
- Created initial wireframes with taking into consideration the main requirements and features.
- Established backend API using .Net Core with Identity framework for authorization and authentication.
- Architected frontend and created reusable components using React framework.
- Optimized app components and improved the product performance using lifecycle methods.

<b>Stock trading (mobile application)</b> Team Member - BCIT Internal Mobile Project	March – Apr. 2020 Vancouver, BC
---	------------------------------------

*Designed and developed a mobile mock trading app that allows users to "Buy" and "Sell" stocks and track the progress of their "portfolio" over time. The purpose of this app is to let people practice investing in the stock market without real money.*

- Implemented cloud-based authentication system.
- Stock data pulled using JSON based API from finnhub.io
